New

# EAGLE™ CLAW

**Precision Pipe and Fittings Assembly System**

## *So make it easy on yourself . . .*

Every workday pipe fittings are assembled and buried broken or are incorrectly assembled with little regard for the integrity of the fitting or fitting seal.

Using the Eagle Claw to assemble fittings provides great benefits. Such as:

- The Eagle Claw allows correct alignment when assembling the fitting to the spigot end of the pipe.
- The Eagle Claw eliminates the need to hammer or otherwise try to assemble the fitting onto the pipe forcibly.
- The Eagle Claw allows the equipment to keep on digging.
- The Eagle Claw installs easily — it drops from the top of the pipe.
- The Eagle Claw works efficiently in ALL soil conditions and types, such as: sand, gravel, frozen ground and solid rock.
- The Eagle Claw will help keep your job “ON TIME” and “ON BUDGET.”

*Difficult  
Projects  
made easy  
with Pro-Pipe  
Solutions'  
EAGLE CLAW*

The NEW  
*and install it right with* **EAGLE CLAW**

Every day PVC Pipe is assembled incorrectly. "It is overbelled". Inserting the spigot end of the pipe past the insertion line creates serious problems such as:

1. Not allowing for expansion or contraction due to temperature changes or earth movement.
2. Using up effective pipe length. Every overbelled joint will consume approximately 1 1/2 to 2 inches of pipe length. While seemingly insignificant, this can add up to 33 feet or more of pipe per mile. That is 1 1/2 lengths and at today's pipe prices . . . figure it out.

These are just a few of the reasons why the Eagle Claw makes sense on today's job sites.

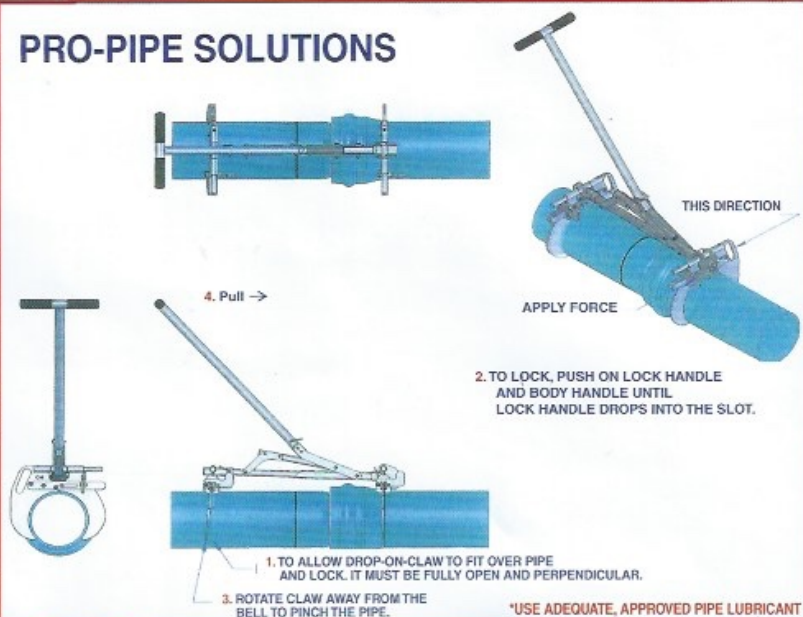

**AVAILABLE FOR:**

- CIPS
- IPS pipe
- Sewer pipe
- Spline lock pipe
- Fittings (all types)
- Bulldog® Gaskets
- Electrical conduit

“... one way that pipe layers are able to easily and quickly achieve proper assembly is through the use of innovative joining devices. A manual pipe-puller is available. The device is lever operated, light weight, and easy to use. Besides eliminating over insertion, the device enables the contractor to install more pipe per day.”

## PRO-PIPE SOLUTIONS

Working with the **EAGLE CLAW**  
is as easy as these 4 steps

Nothing will say it  
as well as  
the person

Satisfied customers find the **EAGLE CLAW**  
“AN ABSOLUTE WINNER”

Dear ProPipe Solutions,

My name is Bernie Bakker. I am the municipal works supervisor for the town of Redcliff, Alberta.

We are currently installing 2.2KM of 300MM C-900 water main. There will be approx. 450 pipe fitting joints to construct on this project.

At the start of the project I was told how the Eagle Claw Tool could be beneficial to us. I immediately ordered the tool, which was shipped promptly.

The tool went on the pipe very easily and with minimal effort I was able to join 2 pipes. It was so easy we couldn't believe it.

This tool is an absolute winner for anybody who is required to do any amount of pipe fitting. I can say all the claims in the brochures are true.

This tool will enhance productivity while saving material.

THANK YOU PRO-PIPE SOLUTIONS.

Sincerely,  
Bernie Bakker

actually using the  
**EAGLE CLAW**  
on-the-job  
every day ...  
the best test by far  
of any product.

... Our experience has been very positive. And, it has allowed the crews to install more pipe in a day, while improving the quality of the installation.

Tim Olivera,  
Papich Construction Company
